

More than 40%
of new Harley-Davidson motorbikes
leaving the factory are equipped
with MICHELIN motorcycle tyres
as original equipment.

MICHELIN COMMANDER II
is also factory equipment on the
iconic Indian Chief Black Hawk.

A new standard in longevity...

- Independent tests* performed in the US on a Harley-Davidson® Electra Glide® Classic prove it: a rear MICHELIN Commander II tyre can last up to **40,000 km**!**
- That's almost twice as long as our main competitors, the Metzeler ME 880 and the Dunlop D407/408
- The longevity of the front MICHELIN Commander II is even greater still!

* Based on commissioned 3rd-party testing performed March-April 2011 by Texas Test Fleet (900 N. Transportation Devine, TX. 78016) on public roads and using the 2010 Harley-Davidson® Electra Glide® Classic. Comparison based on results of the MICHELIN Commander II versus the METZLER ME880 and the Dunlop D407/408 in sizes 130/80 B 17 (Front) and the 180/65 B 16 (Rear).
** Individual results may vary depending on motorcycle type and operating conditions.

... No compromises on handling and stability

- Amplified Density Technology:** a highly dense, more rigid tyre carcass which helps deliver excellent feedback and handling.
- Aramid tread** piles on the rear tyre: resists centrifugal growth, along with weight savings which provides perfect stability, even at high speed.
- A unique longitudinal tread pattern which maximises water evacuation and grip on wet roads.

A groundbreaking new look

- A radically different tread pattern for head-turning looks!
- A premium sidewall treatment to give an impeccable finish to your Cruiser!
